TABLETS

Ø 5 mm compressed **round**

- Round, biconvex tablets for dosing small quantities of mixture.
- Adjustable hardness from 60 Nm to 150 Nm depending on formulation.
- Weight per unit from 0.10 g to 0.40 g.

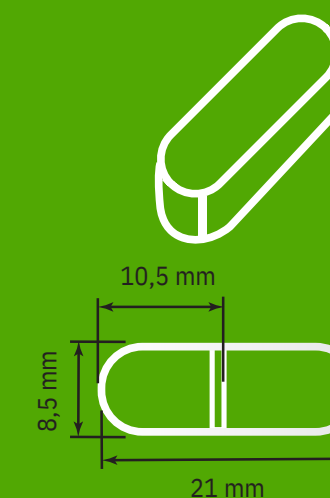

Ø 10 mm compressed **round**

- Round tablets for easy swallowing.
- Adjustable hardness from 60 Nm to 150 Nm depending on formulation.
- Weight per unit from 0.15 g to 0.60 g depending on formulation.

21 x 8.5 mm flat **oval shape**

- Tablet capacity from 1.0 g to 1.8 g depending on the formulation.
- Adjustable hardness from 60 Nm to 150 Nm depending on formulation.
- Middle groove for improved dosage.

BOTTLES PET/PLA

Bottle from
75 to 500 cc.

- With **screw cap** and **induction closure**.
- Bottles and caps available in different **colours**.
- Biodegradable **packaging** line.
- Possibility of **single** or **multilayer labelling**.
- Batch and **expiry date** option on **cap** or **label**.

Pill bottle
For capsules or tablets.

ALU - ALU

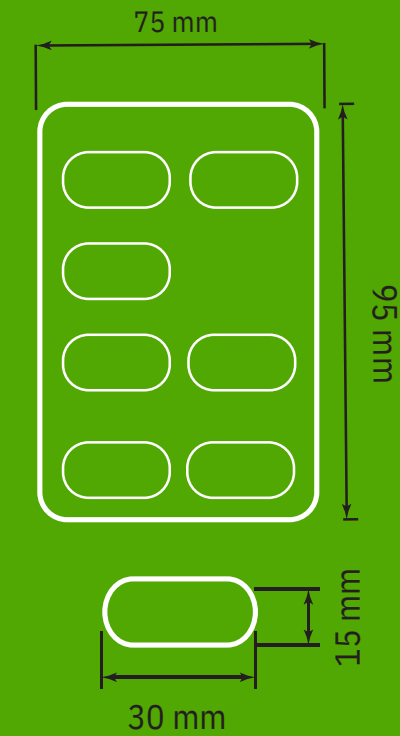

Capsules

7 units.

ALU/ALU

Only with N°. '1'
capsules

Single dose

- Single-dose units of total barrier generated by the aluminium material on both sides of the barrier.
- Heat-sealed closure.
- Easy-open die for better handling.
- Possibility to include '0' and '00' capsule.

LIQUIDS

Glass bottle

30 ml to 60 ml.

For viscous liquids and syrups with the possibility of external labelling.

Pilfer lid.

Glass bottle

75 > 200

For viscous liquids and syrups with the possibility of external labelling.

Glass bottle

125 > 500

For viscous liquids and syrups with the possibility of external labelling.

SMALL CAPACITIES

Vial ampoule

**10 ml capacity
easy to open**

Glass ampoule

**Capacity of
5 and 10 ml**

Unicadose®

- Single-dose dosing system for products in liquid and semi-solid form, low viscosity gel type.
- Versatility in transport.
- Possibility of batching and identification by product.
- Standard colours white and amber. Other colours available on request.
- Hermetic seal tested on all units produced.
- Made of recyclable polypropylene.
- Capacity from 10 to 15 ml.

STICKS

LIQUID

- Single doses of liquid product with variable viscosity.
- Heat-sealed aluminium body with easy-open die cut.
- Batching and expiry date laser silk-screen printed.
- Possibility of external screen printing on the packaging reel.

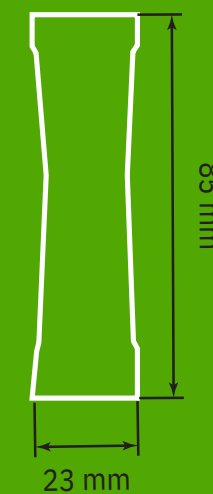

10 ml

POWDER

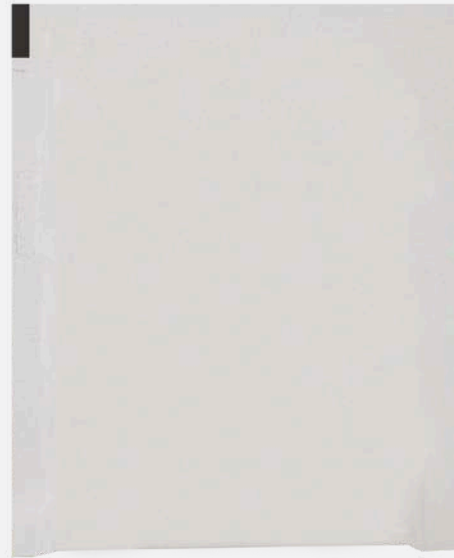

- Single doses of powder or granular product.
- Thermosealed aluminium body with easy-open laser pre-cut.
- Batching and expiry date screen-printed by laser.
- Possibility of external silk-screen printing on the packaging reel.

1 - 5 g

POWDER

Envelope capacity

- Product quantity from 1 g to 30 g depending on size.
- Batch and expiry date stamped on the edge or silk-screened.

Container

- Metal can for powdered products.
- Sealed metal can.
- **200 gr**
- **300 gr**
- **400 gr**
- Possibility of being lithographed or finished with a single or multilayer adhesive label.
- Top closure with multi-purpose plastic lid.

Bottle powder

- PET in different colours.
- From 100 g to 1000 g.
- Adhesive label.
- Plastic lid with induction sealed liner.
